

CODE OF CONDUCT

Be Careful

Walk at all times.

Use only the tools you've been trained to use!

Ask the monitor if you are unsure about how to do something.

Follow the rules and procedures for each machine.

Clean-up after yourself—leave the area better than you found it.

Be Respectful

Speak softly.

Ask permission before touching another maker's work.

Ask for help if you need it.

Offer help if you can give it.

Ask the monitor to help if there are problems between makers.

Be a Maker

Work together if needed.

Respect the work of other makers.

If your idea doesn't work out the way you wanted, try again!

It's the making that matters, not the final product.
